

Daily Task Widgets

A simple card system for the BookingPartner backend dashboard: Today, Tomorrow, This Week, Progress, and Blockers.

TODAY

Fri, 18 Sep 2023

- ☐ Install PostgreSQL on the laptop.
- ☐ Create bookingpartner_dev.
- ☐ Fill development values in .env.local.
- ☐ Run Prisma migration/generate commands.
- ☐ Open pgAdmin and confirm tables.
- ☐ Run the app and confirm localhost:3000 works.

0% complete

Focus rule: finish this card before starting tomorrow's authentication work.

TOMORROW

Sat, 19 Sep 2023

- ☐ Create lib/prisma.ts.
- ☐ Create lib/auth.ts.
- ☐ Set up the NextAuth route.
- ☐ Create one test user.
- ☐ Test login, session, and logout.

FOCUS

Setup

foundation

THIS WEEK

Week 1

- ☐ Fri 18 - Local PostgreSQL + project database
- ☐ Sat 19 - Prisma connection + login
- ☐ Sun 20 - Protect owner/admin pages
- ☐ Mon 21 - Pusher live updates
- ☐ Tue 22 - Resend email
- ☐ Wed 23 - PayHere sandbox setup
- ☐ Thu 24 - PayHere webhook verification

0% complete

One line per day. Tap/open a day in the app to see its full checklist.

Widget behavior

The small card shows only today's most important jobs. The full day opens as a checklist. When every box is checked, the day becomes DONE and Tomorrow automatically becomes Today.

Small home-screen style card

TODAY

0 / 6 done

Backend setup

Next: Install PostgreSQL

After that: create bookingpartner_dev

Recommended information hierarchy

- ☐ Top: TODAY / TOMORROW / THIS WEEK label.
- ☐ Second: plain-language task name, not a technical file path.
- ☐ Third: progress such as 3 / 6 done.
- ☐ Then: the next one or two actions only.
- ☐ Use full technical details only after the card is opened.
- ☐ Show a red blocker note only when progress cannot continue.

Simple color meaning

Green = today/active. Purple = tomorrow/planned. Blue = this week. Amber = waiting or needs attention. Red = blocked/error. Grey = done or not active.

Do not hide problems inside the task list

BLOCKED

Example

- ☐ PayHere merchant sandbox account is not approved yet.
- ☐ Do not fake a successful payment to continue.
- ☐ Continue non-payment work while the account issue is resolved.

A blocker card should say what is stopped, why, and the safe next action.

NOTES

Example

- ☐ Remember the PostgreSQL password in a secure password manager.
- ☐ Never commit .env.local.
- ☐ Use test users and test bookings in development.
- ☐ Write down any database change before applying it to production.

Done when: _____

TOMORROW

Date: _____

- ☐ _____
- ☐ _____
- ☐ _____
- ☐ _____

IMPLEMENTATION NOTES

If you build this widget inside your Next.js dashboard

- ☐ Store each task with a date, title, order, done/not-done state, and optional note.
- ☐ Calculate Today/Tomorrow from the user's local date.
- ☐ Show the full checklist after the user opens the card.
- ☐ Save each checkbox immediately so a refresh does not lose progress.
- ☐ Use the same visual card on desktop and mobile, only changing width.
- ☐ Do not put passwords, API keys, or payment secrets into task notes.

First widget content

Start with the Week 1 tasks in this PDF. You can later load all 12 weeks so the card automatically shows the correct day from the schedule.
